Summary

- Since february 2021 I work for Webdilio Group on projects based on technologies I'm familiar with (Javascript, Node.js, MongoDB). I'm proud to say I raised far beyond the expectations as a junior, as I managed to keep up with a team of more experienced developers.
- I'm a member of Mensa (The high IQ society) and I'm part of the developers team. We work voluntarily on some development projects for Mensa taking care of the UI and UX parts of the official website and automatize the enrollment process of the candidates .
- I have a very high IQ that gives me the ability to learn every programming language in few weeks.
- At the begining of my career I collaborated with Cisco on some projects to get some hands-on experience through one of my friends who works for them. So I had the opportunity to learn something more about hardware and networking.
- I posted some small projects I worked in my free time to give you a sample of my abilities .

Experience

Full-stack Developer

Webdil.io

Feb 2021 - Present (1 year 11 months +)

I work on complex full-stack projects together with an international team of developers. In those projects I make the web pages functional (front-end) using Javascript but sometimes I also make the back-end part (mainly API's written in node.js to connect to Mongo database). I always accomplished my tasks way before the deadlines.

Member

Mensa International

Oct 2019 - Present (3 years 3 months +)

We improved the user interface and the enrollment form for tests in the Mensa website. In the login form I built the admin page that collects all the applications, stores them and generates reports based on test centers. Also implemented age verification, autocompletion and other features that made UX better.

We are currently working on automatizing the mail notification for tax payment and generating reports.

Technologies used: Javascript, NodeJs(Express), MongoDB

Education

Udemy

Certificate, Javascript Node.js HTML Css

Police academy

Licenta, Law

Sep 2000 - Jun 2004

Fratii Buzesti National College, Craiova, Romania

baccalaureate + English Certificate, Mathematics and physics

Sep 1996 - Jun 2000

Licenses & Certifications

Complete Javascript Course from zero to expert - Udemy

UC-5ae04483-c32e-466b-94d2-33a707a5c47f
